Diploma in Environmental Science

Did you know we could save up to 75,000 trees if we just started recycling the paper used in the New York Times' daily run? Or that there is a design for a single solar power plant that will produce enough electricity to power 1 million American homes? Environmental science has the potential to change our lives and the future of planet Earth in countless ways. Great minds across the world are joining forces to make that future better, and you can be one of them.

Biology - Genes and Gene Technology

It is over sixty years since the structure of DNA was first discovered by Watson and Crick. Since then work in genetics and gene technology has expanded to the point where the entire human genome has been sequenced, and there is now hope of being able to cure diseases using gene therapy. There is also on-going work in the area of modifying plant DNA to produce pest-resistant crops that give bigger harvests for more food.

Diploma in Children's Studies

Children from birth to the age of 18 are now considered academically to represent a distinct sociological and cultural class. This means that children are studied as complete individuals in their own right, separate and distinct from adults. Alison's course is multi-disciplinary in nature, covering developmental, psychological, familial and sociological aspects of children's studies.

Diploma in C Programming

The C programming language is one of the most popular and widely used programming languages and is commonly used to program operating systems such as Unix. It is a general-purpose programming language and one of the main advantages of programming in C is that it allows the programmer to write directly to memory. This means that key constructs within C-generated software programs can be used within the memory in an efficient and machine-independent fashion.

Diploma in Educational Psychology

Educational psychology is concerned with how students learn and develop. It emphasizes trends in educational development while also focusing on educational diversity. For teachers and trainers to fulfill their instructional role most effectively, their teaching methods must be grounded in educational psychology. Educational psychology provides a framework for teachers and trainers to plan, create and deliver effective lessons, and assess each student's learning.
